Foley to head new Rec Center

John S. Foley, long-time administrator and graduate of Rhode Island College, has been named director of the College's new recreational complex, planned promotion and management of its operations," President Guardo announced last week by President Carol Guardo.

As director, John will supervise our new recreational complex, plan its promotion and staff. "In addition, he will continue to work with me on special assignments," she added.

"This will be John's fifth major position at the College to which I'm confident he will bring his characteristic upbeat spirit, enthusiasm and dedication to the College," Guardo said in the letter. She went on to note that Foley, a 1967 graduate of the College, was an outstanding athletic who began his career here as an admissions officer immediately after graduation. In 1971 Foley was named director of admissions, a post he held for seven years. "During those years, he recognized the office, redesigned its data systems, enhanced school/college and student/college relations, and increased our annual enrollment yield. He also co-founded the Gold Key Society (continued on page 6)

College breaks own record for grant funds received with over $3 million

Total grants and contract awards received through the Rhode Island College Office of Research and Grants Administration during the 1988 fiscal year reached $3,252,091, some 27 percent more than last fiscal year and a new record for the College.

The previous record—set in 1980—was $2,011,586. The total this year is 11 percent higher.

Some 118 grants and contracts were received by the College during the fiscal year, which was actually four less than reported in 1987, but the average grant/contract awards for this year was $27,560, up $3,807 from the previous fiscal year, reports Dr. R.N. Keogh, director of research and grants administration.

With the exception of Continuing Education, the School of Education and Human Development, CEBRRC, and the library, all other divisions of the College experienced gains in total dollars over last year, says Keogh.

The percentage gains recorded show Aca-
demic Affairs up 41 percent, Administration and Finance up 98 percent, Arts and Sciences up 84 percent, Social Work up 76 percent, and Student Affairs up 27 percent.

Keogh points out in his annual report, which coincided with the close of the federal fiscal year (Sept. 30), that Continuing Education and Human Development was down "very slightly" (1 percent), while Continuing Education's sharp drop "largely was caused by the transfer of the Urban Educational Center (UEC) program to the Community College of Rhode Island.

Discounting this transfer of funds, Continuing Education's total drop was just under percent.

"Fiscal year 1988 marks a watershed year in the history of sponsored-programs administra-
tion at Rhode Island College," notes Keogh.

While it marks the first full year in which the office operated under its new designa-
tion, the Office of Research and Grants Ad-
ministration, "more importantly, it is the first year that total grant awards exceeded the previous record dollar volume of extramural (outside) support set in fiscal 1980.

"This," says Keogh, "the office has achieved a long-standing goal of breaking this earlier record.

The director also makes note of two other goals being achieved: the establishment of "institutional" grant awards such as those from FIPSE (Fund for the Improvement of Postsecondary Education), and a "significant increase" in the number and total volume of grant dollars received by the Fac-
ulty of Arts and Sciences.

Concerning the "institutional" grant awards, which Keogh reports was led prin-
cipally by the Office of the Provost, the Col-
lege "has gained national recognition for its leadership" in fostering improved under-
graduate student learning and retention.

"Largely because of this effort, the Col-
lege has achieved the almost unprecedented feat of receiving five grant awards during the past five years from the prestigious and highly competitive Fund for the Improve-
ment of Postsecondary Education.

"Indeed, the College has received two new FIPSE awards for FY 1989, also an almost unprecedented accomplishment," says Keogh.

He attributes the "significant increase" for the Faculty of Arts and Sciences to the ef-
forts, in part, of several Arts and Sciences faculty members, Jean David L. Greene and his staff. Keogh also noted improvements have been made in the use of his office’s microcomput-
er in monitoring post-award administrata-
tion.

Research and Grants Administration:
Request for proposals

The Office of Research and Grants Administration will be providing information about research opportunities for proposals (RFPs) on a regular basis in this column. Anyone interested in obtaining further information or applications and guidelines need only circle the number of the RFP on the coupon below and send it to the office in Roberts 302.

1. U.S. Department of Education: IDEA: Lectures Program. Provides grants and cooperative agreements to institutions of postsecondary education and other public and private agencies to improve postsecondary education and the equity of education opportunity through the preparation and presentation of lectures on key issues in educational administration and practice at major conferences and other relevant settings. Up to $8, $20,000 is expected to be available to fund new awards. DEADLINE: Jan. 1989.

2. National Academy of Education: Statement of Grant Opportunities. Invites inquiries about the possibility of funding for training and production of programs for broadcast to a national audience. The current priority areas are news and public affairs programs, cultural arts programs, and drama and arts programs. There is no restriction on the amount of funds that may be requested, but applications are encouraged to seek additional sources of support. DEADLINE: Jan. 6, 1989.

3. Corporation for Public Broadcasting: Program Fund. Funds support the development of innovative educational programs for broadcast to a national audience. The current priority areas are news and public affairs programs, cultural arts programs, and drama and arts programs. There is no restriction on the amount of funds that may be requested, but applications are encouraged to seek additional sources of support. DEADLINE: Jan. 6, 1989.

Psych colloquium here Nov. 16th

"Psychological Characteristics of Patients with Chest Pain and Normal Coronary Arteries" is the topic of the second entry in the Maine College Fall Psychology Department colloquium series. Dr. James McCrory, associate professor of the Department of Medical Sciences, will be the speaker at 12:30 p.m. on Wednesday, Nov. 16, in room 105, Brown Hall 193.

The colloquium is free and open to the public.

The first entry in the series addressed the future of health care in corporate America on Nov. 9. The series will feature recent advances of quantitative methods in the social sciences. Dates and topics will be published at a later date.
Board of Gov's cites college faculty for excellence

Several Rhode Island College faculty join the College's distinguished ranks, and the Board of Governors has taken the opportunity to recognize their excellence in a recent ceremony.

The Rev. Ralph D. Abernathy, Dr. Martin Luther King Jr.'s hand-picked successor as president of the Southern Christian Leadership Conference, will deliver an address on the topic of civil rights, race, and the future. "Where Do We Go From Here?" in Rhode Island College's Gaige Hall auditorium on Monday, Nov. 11, at 7:30 p.m.

A tireless preacher on behalf of racial equality across the nation and around the world, Abernathy rose to national prominence when he joined with other black civil rights leaders, including Dr. Martin Luther King Jr., at a rally in Chicago, Ill., in 1966.

Since then, the civil rights activist has been arrested 38 times for "advancing the cause of freedom." He assumed the presidency of the Southern Christian Leadership Conference in 1968 after King's assassination.

Ralph Abernathy's travels on behalf of brotherhood have taken him to West Africa, Europe, for the Conference on Positive Action for the Peace and Security of Africa, to Rome for a meeting with Pope Paul VI, to Osaka, Nippon, in a way, to witness Dr. King's acceptance of the Nobel Peace Prize.

He attended the Conference for World Peace, traveled to the Soviet Union at the invitation of its foreign minister, visited East and West Germany where he received the peace medalation from the German Democratic Republic, and to Helsinki where he participated in the World Peace Council meeting on racism and apartheid in South Africa.

A prophet not without in his own country, Abernathy was named in a 1972 Harris Poll as the most respected black leader in America among blacks polled.

The public is invited to attend free of charge. The event is being sponsored by Hartman and the black student organization at the College.

Math Assn. of America to conduct fall meeting here

To examine trends indicating a future 'severe shortage' of math scientists

The Mathematical Association of America (MAA) will hold its annual meeting Oct. 27-29 at the Hyatt Regency in New Orleans, La., the only meeting of its kind this year.

Dr. Henry P. Guillotte, Enhanced Math Preparation for Minorities; and Dr. Spencer McMahon as part of the ceremony. The recognition will be the culmination of a week devoted to recognizing the achievements of the College faculty, who will be honored for their years of service to the College. The pins, designed to mark 20 years and 25 years of service, as well as for retirement from the College.

At the lunch on Monday, Nov. 1, Dr. Guardo will present certificates and commemorative pins recognizing the contributions of the College's Paul Maixner Awards for Distinguished Teaching; C. Annette Ducey, professor of English, recipient of the Faculty of Arts and Sciences Distinguished Service Award; and Terence E. Hays, professor of anthro­pology and Frederic Reamer, professor of social work, this year's Mary Tucker Thorp Awards for Distinguished Teaching.

The recipients of this year's grants from the Rhode Island's Fund for Excellence in Education were also introduced by McMahan as part of the ceremony. The recipients of these grants, listed in the Rhode Island College News, June 20, are: Patricia A. Soellner-Vance, Student Portal Project; James G. Magyar and Dr. Kenneth L. Hefetz, associate professor of mathematics at the Community College of Rhode Island, for their presentations as part of the 1988 William F. Flanagan Distinguished Lecture Program.

Safety Tips

With the return to standard time, darkness now sets in earlier.

Don’t hesitate to call the Security and Safety Department for an escort. This service is provided for your protection. Report all suspicious-looking persons to security as soon as possible.

Don’t hitchhike or accept rides from strangers. They could very well be the bad guys.

Two tickets to the New England Telephone Music Center on Monday, Dr. Dix Coons at 7:30 P.M.

The information desk located at the south end of parking lot B and College Road.

The vest hall of Donovan Dining Center across from the south end entrance to the student union.

The front of Walsh Hall on the south end of the building.

New look, same commitment at reading and study skills center
by Denis Bessette

There's a new look to Rhode Island College's Reading and Study Skills Center this year.

New faces, new programs, even new partitions greet a visitor to the center, located in Craig-Lee 224.

The new faces begin in the director's office, where Dr. Marilyn E. Eamer has left to devote all of her energies to her position as professor of elementary education. Replacing her on an interim basis is Patricia Soelker Younce, assistant to the provost.

As an administrator, formerly stationed in Roberts Hall, Younce has devoted much of her time to what she refers to as "student-oriented" efforts including the Student Potential Program (SPP) and the development of personal learning plans (PLPs) for the College's undergraduates.

Four-part learning skills advising staff the Reading and Study Skills Center, counseling students individually or in small groups and also conducting workshops. Students come to the center either on their own or by referral.

A student having difficulty with his or her studies is first given a diagnostic interview to determine specific problem areas.

"A lot of the times the student will come in knowing that they have a problem with reading comprehension, reading speed or not taking," Younce said. "Other times they are not able to pinpoint their problem as easily."

Younce noted that students accepted for admission to Rhode Island College are considered to the potential for success. There is no guarantee.

"Students can find themselves overwhelmed by the amount of work facing them," she said. Younce gave an example a student who faces the task of reading (and more importantly, understanding) 150 pages of a Western civilization text.

Jayne Nightingale, one of the Center's learning skills advisors, reported that students of all ages have been making use of the Center.

"The numbers are there," she said. "They're keeping us busy and responding well to the help that we offer them."

Another tutor, Joan Tookey, noted that a lot of the students she sees need help in the areas of test-taking, time management and reading skills.

She explained one of the tools she uses to assist students in areas such as time management and study skills strategies.

"I hand the student a schedule and make him fill it out, listing his priorities in categories of A, B and C," she said. "If the student has attended to all of his top priorities, then next time he should be better able to determine what's most important, what really needs attention."

Tookey has some thoughts to share on how to better understand reading matter too.

"When you're reading matter, you should stop and quiz yourself on a passage that you've read," she suggests. Another tip: "Take notes on what you're reading, just as you would take notes from a lecture."

Workshops dealing with "Study Strategies: Focus on Exams," presented by Tookey and fellow tutor Marilyn Bessette, will be held on Tuesday, Nov. 15 and Monday, Nov. 21 in the Foren Meeting Room in Adams Library from 10 to 11 a.m.

Younce noted that two separate groups have been designated to review the College's efforts to help its students achieve academic success.

The College Council has appointed a committee to work with Younce this year in helping to review the objectives of the Reading and Study Skills Center. The membership includes Dr. Mary McGann, Dr. Marilyn Eamer, Dr. Thomas Fox, Dr. Margaret Habermehl, Dr. Robert Meyer, Joseph Costa and Dr. James Bierden.

In addition, Dr. Robert Carey and his staff at the Center for Evaluation and Research (CERR) will conduct a needs assessment for specific academic support services during the 1988-89 academic year.

Clare F. Joy is named assistant director/news

Clare F. Joy of Wakefield has been appointed assistant director of Clare's Jay News, the student-run news and information newsletter at Rhode Island College, it was announced by director of communications Robert K. Bower.

A seasoned professional in news gathering and writing, Joy has been working for the Providence Journal-Bulletin, as a reporter for the Center for Education Policy Planning, and assistant director of Student Programs on a continuing basis, the College's news and publications services.

"I am excited to have Clare Joy join our team in the office of news and publications services," said Younce. "I am confident she will quickly make a major contribution in getting out the good news about Rhode Island College, and that she will work well with our other academic advisors."

The Office of Academic Advisement that advises each student "set with his or her academic advisor before registering. Those without an advisor may make an appointment to meet with an advisor at the Academic Advisement and Information Center, 456-8212."
and served as its advisor for ten years," Guardo noted.

Foley was appointed executive director of the College advancement and support unit in 1979. In 1981 he was named vice president of the same area.

Of his service in these positions, Guardo said, "John revolutionized in and reorganized the structure of the Rhode Island College Foundation, increased annual giving, and saw foundation assets top the one million dollar mark.

Of special significance, given the planned opening of the newly renovated Whipple building this January, John was instrumental in implementing and coordinating the promotional campaign which resulted in passage of the $2.5 million bond issue for the conversion of Whipple into the center for industrial technology.

The Honors Committee staff has also been instrumental in designing, implementing and coordinating the promotional campaign which resulted in passage of the $2.5 million bond issue for the conversion of Whipple into the center for industrial technology.

Under the guidelines of this activity, a student finds a faculty advisor to work with him or her on a research or project of interest to the student. Once the project is completed, the student must make a presentation to the Honors Committee. Funding support for the Senior Project is available through a $5,000 Presidential Grant Fund.

Another grant, in the amount of $8,000, from the Rhode Island Governor's Incentive Grants for Excellence in Education, is being used to make the Honors Program curriculum more interdisciplinary in nature, Hall explained.

Intermediate core courses in the areas of English and history will be broadened to include a focus on the areas of visual art, music and philosophy, he said.

"We've been surprised by the interest and excitement this idea has generated," the Honors Program director commented.

Another area in which Hall feels Rhode Island College's Honors Program will make a difference is in the amount of scholarship aid the school offers.

"Over $50,000 in scholarships is available this year and the majority of our entering students have received either a full- or half-tuition scholarship," he noted. These scholarships are based on merit, rather than financial need and are all renewable as long as the student continues to meet requirements of the Honors Program, he pointed out.

Hall explained that the money comes from three sources. The Bacon-Ballinger Honors Scholarship, funded by the R.I. College Foundation, the Governor's Honors Scholarship, funded by the State of Rhode Island; and the Faculty Honors Scholarship, funded by the College itself.

"This amount of scholarship money is really meant for a college of our size and has been instrumental in recruiting and retaining students."'

## RECORD

The Office of Research and Grants Administration shortly will receive the database used by the American Association of State Colleges and Universities (AASCU) Office of Faculty Program, biology department, potential sources of funding for NSF sub-

Acquisition of the database will permit sophisticated on-campus searches of potential federal and foundation sponsors, he says.

Installation of the database should occur sometime during the fall fiscal year, says Kough.

Trying to change their prospects

(continued from page 1)

Nearby, Rachel Carpenter of the library's circulation department demonstrated the Academic Index machine, reproducing an article from a wrestling magazine.

Another stop on the students' Rhode Island College tour was the Anatomy Lab in Fogarty Life Science Center.

"That's a monitor lid," explained Dr. Ken Kinney, chair of biology department, pointing out a reptile in a jar filled with formaldehyde.

"Is he dead?" someone asked.

"Yes, he's preserved, so we can study him," Kinney replied.

Skulls, skeletons and fossils all got a close-up look from the eager grammar schoolers.

The sight of a cat's body sliced open, its internal organs on display, was a bit disconcerting to ten-year-old Shane Ross.

"I'm 5! I'm 5!" she exclaimed. Given a moment to reflect on the corpse's scientific purpose, she added, "I want to be a doctor, so I'll have to get used to it." Finally, she said with conviction: "I can get used to it."

The students also toured a residence hall, the Student Union and enjoyed lunch at Donovan Dining Center (courtesy of the Office of Residential Life and Housing) before boarding their buses and returning to elementary school life.

The Honors Committee and College staff agreed the program is a good one.

At home, these children are exposed to discouragement, despair, giving up and dropping out," said teacher Carol Sullivan, a Rhode Island College alumna.

"It's a good idea to start exposing them to something better at an early age," she added.

"There are some kids here who could really do something with their lives, but left to their own devices or the devices of their environment they could fail," she said.

Sharon Maryck, herself a product of South Providence, feels the College community can "really make a difference" with the Fogarty School children.

"It's a good idea to start exposing them to something better at an early age," she added.

"There are some kids here who could really do something with their lives, but left to their own devices or the devices of their environment they could fail," she said.

Said Trena Johnson-Smith:

"Participating in this program gives me a greater sense of hope, that some of these kids will be attracted to college life."

Of the campus, the second one to date (the first was held in May) is just one of

Volleyball finishes with a title

The women's volleyball team finished their regular season on a high note, capturing first place in the Roger Williams College Invitational, capturing first place in the Roger Williams College Invitational, capturing first place in the Roger Williams College Invitational. The squad defeated the host school 15-7, 15-9, 15-7, and then knocked off highly ranked University of Massachusetts at Boston 15-7, 15-6, 15-4 in the second round. They lost to perennial nemesis Western Connecticut 15-8, 15-11, 15, 14-16 in round three, but captured first place with their 2-1 record because Clark had beaten Eastern Connecticut earlier. This is the first time the team has captured top honors in this event.

Sophomores Deb Allen and Jen Shulte were honored for their outstanding play by being named to the All-Tournament Team. For Allen it was the third time this year she has been so rewarded.

Overall, 1988 was a special year. D'Antuono had led the team to 21-1 record because Clark had beaten Eastern Connecticut School, placing 18th with 1988's best effort ever by an Anchormen squad in this event.

Reinsel's Polycraft captured first place honors with 56 points. The Anchormen were second with 53 points and Rensselaer Polytech was third with 53. Thirty teams competed in the five and a half mile event. A team record of 1-17-12 by James Daudenou turned in perhaps the finest effort of his career, finishing in second place. Additionally, Lisyn Couissoudes also had a spectacular race, placing fourth in 27:04. Freshman Kevin O'Neill continued his consistent performances with a 4th place finish in 27:30, as did Brian O'Malley, a transfer from the University of Massachusetts at Boston, but they were the 47th and 48th place finishers with a time of 28:35. Junior Dave Menard placed 47th in 28:39 and Jim Osinnay came in 46th place with a time of 29:10.

The women runners also competed in the ECAC Northeast Region Division III Championship at SUNY-Albany, the best ever finish ever by an Anchormen squad in this event.

The men's cross country team also had an outstanding meet recently, placing second in the ECAC Northeast Division Region Division III post-season tournament berth. Their performance in this recent tournament certainly helped their chances a great deal.

Wrestling

On the winter sport front the wrestling team was slated to begin action November 11 and 12 at the Ithaca College Tournament in Ithaca, New York. The defending New England Champions are loaded once again. All-American Scott Martin returns at 133 pounds, but one of the team's top performers, a third place finisher at 180 pounds, has graduated. Jim LeBlanc Brian Allen is back at 125. Two-time All-New England selection Joe Amato is back at 194 and New England runner-up John Walsh is back at 142 pounds.

As does Brian O'Malley who finished 27th in 27:30, respectively. Freshman George Anderson should fill the 190-pound slot and 134 and New England placewinner Jeff Kirwan has the inside track. Freshman keeper Frank Kowalik has the inside track at 158, but Dan Gillooly and Scott Cartman, a former High School All-American, are both seriously challenging.

New England placewinners Jeff Kirwan and Chris Reddy seemed prim to go on to 867 and 177, respectively. Those two and sophomore Joe Potemri should form a solid trio that could have a glittering opportunity to tie the game at three with 10 minutes left when he broke in partially alone on the left wing and hit a hard, low shot to the corner, but Freshman keeper Jonathan Pratt made the save of the game with a diving stop to thwart the Anchormen.

Kowalik finished with 20 saves in net, one of his best performances of the season. The Anchormen defense spelled for top-form performances with a 14th place finish in 27:30, as did Brian O'Malley, who finished 44th in 164th place with a time of 38:10.

The men's soccer squad finished their season with a strong effort against the University of Massachusetts at Boston, but they were the 5-3-0 p.d. lead.

After the Beacons bowed to the Beacons 4-2 and ended their post-season tournament berth. Their performance in this recent tournament certainly helped their chances a great deal.

The men's cross country team also had an outstanding meet recently, placing second in the ECAC Northeast Region Division III post-season tournament berth. Their performance in this recent tournament certainly helped their chances a great deal.

Junior Nancy Gillooly was the top Anchorman, finishing 45th in 21:20, taking 47th place in 21:20, and 177, respectively. Veteran Greg Anderson should fill the 190-pound slot and 134 and New England placewinner Jeff Kirwan has the inside track. Freshman keeper Frank Kowalik has the inside track at 158, but Dan Gillooly and Scott Cartman, a former High School All-American, are both seriously challenging.

Russell Farnsworth—King Balthazar
Tim Poore—Balthazar’s Page
Mitchell Robert—Sebastian—Drummer
Edward Markward—Conductor

Other seasonal works include compositions by Billings, Victoria, Paul Nelson and the Handel Premiere of Carol by Robert Elam.

Premier of ‘Carol’ set for Nov. 28
Rhode Island College Orchestra and Chamber Singers will perform the premier of ‘Carol’ for chamber choir and orchestra by music professor Robert W. Elam on Monday, Nov. 28, at 8:15 p.m. in Roberts Hall auditorium. Directed by Edward Markward, “Carol” was conceived during a sabbatical leave in the spring of 1984 by Elam while studying the works of the late Martha Ballinger—“for material suitable to musical composition.”

“Carol” was a Christmas poem written by Bacon-Ballinger, who had been an associate professor of English here when she died in 1981. Educated privately both in the United States and in Europe, she had served on the editorial staffs of the Atlantic Monthly, Vogue, and Harper’s Bazaar and had written some half-dozen books, among her other written works. “The abundance of visual imagery in ‘Carol’ was immediately striking and summoned corresponding aural imagery to the ear of the composer,” says Elam, who is director of the performing and fine arts at the College. It is the composer’s desire that the listener “use his/her wide domain of fantasy to reflect upon and celebrate that blessed event in Bethlehem which continues to be a source of faith and inspiration for creativity in the arts and lives of man.”

Also featured in the program that evening will be Gian Carlo Menotti’s Amahl and the Night Visitors as well as seasonal compositions by Billings, Victoria, and Paul Nelson. The performance is free and open to the public.

Other seasonal works include compositions by Billings, Victoria, Paul Nelson and the Handel Premier of Carol by Robert Elam.

Playing the Crystals are Robert Bobola of Lincoln and Brenda Young of Scituate.

Rhode Island College Wind Ensemble will perform in concert on Sunday, Nov. 20, at 3 p.m. in Roberts Hall auditorium.

The composition of ‘Carol’ has utilized several unusual instruments in the performance of his work: crystal glasses which are played by rubbing the rims, a water gong (a gong dipped into a tub of water while it is vibrating), and a Lion’s Roar (a modified drum that simulates the sounds of large animals).

Duffy has written for several different performing media. One of his latest, “Trip­ tych for Orchestra,” was nominated for the Pulitzer Prize last year.

Duffy, here on Oct. 24, lectured music students on “The Role of the Composer—Conductor in 20th Century Music.”

The concert is free and open to the public. Dr. Francis M. Marchant, professor of music, will conduct. The concert is being funded, in part, by the Rhode Island Fine and Performing Arts Commission.

PLAYING THE CRYSTALS are Robert Bobola of Lincoln and Brenda Young of Scituate.
