You've heard of Santa Claus; what about 'Grandfather Frost' and 'Snow Girl?' By George LaTour

In my family, we used to have a big ball on New Year's Eve—about 10 p.m.—and say 'Goodbye' to the past year and at midnight say 'Hello' to the new year,' she says. "There was a lot of entertainment and surprises, good food and good stories during the last New Year's cold night for people whom you loved. There was always a lot of dancing and jokes. It was the best holiday. I loved it very much. People became children again. It filled you with hope for the best,' she assures. "It was my favorite holiday because it wasn't revolutionary.'

"Getting tree difficult
Being communist, the government didn't celebrate the (Christmas) holiday," Zhanna emphasizes again, "but there were some decorations—not like here—in the streets and they did put a New Year's tree in the big squares in Moscow. Sometimes you could see Grandfather Frost there. People didn't talk about it (religious holiday) except for wishing each other the best for the new year.'" Zhanna says getting a New Year's tree could be very enjoyable. "You'd stand in line at the market and if you got one you were lucky," she says. Now, you can get small artificial trees, but, she admits, "I love the smell of the real ones.'"

Zhanna says getting a New Year's tree was especially difficult because of her initial difficulty with the English language. "I had great difficulty with the language," she anoes, "but they were very patient with me and helped me a lot." "I thought if I had an American college diploma (in music) then people would know that I know what I need to know to teach here." "With my credentials from Russia and an American degree, I think I may be able to get a professional job teaching,'" says Zhanna, who feels "I can be really useful to my new Motherland.'"

Zhanna says she would like very much to remain in Russia. "It was my favorite holiday because it wasn't revolutionary.'

...People were free to observe Christmas

Grandfather Frost instead

Instead of Santa Claus on Christmas, Russians have their Grandfather Frost and his granddaughter, Snow Girl, who visit the homes of good little boys and girls on New Year's Eve. That's right—New Year's Eve. And, they even have a Christmas tree, but they don't call it a Christmas tree. They call it a New Year's tree, naturally. It is usually a pine (evergreen) tree as in this country.

Grandfather Frost and Snow Girl come to the homes during the night of New Year's Eve. Snow Girl takes gifts from the sack Grandfather Frost carries and leaves them under the tree. "People become very kind to one another and especially to the children.

Getting tree difficult
Being communist, the government didn't celebrate the (Christmas) holiday," Zhanna emphasizes again, "but there were some decorations—not like here—in the streets and they did put a New Year's tree in the big squares in Moscow. Sometimes you could see Grandfather Frost there. People didn't talk about it (religious holiday) except for wishing each other the best for the new year.'" Zhanna says getting a New Year's tree could be very enjoyable. "You'd stand in line at the market and if you got one you were lucky," she says. Now, you can get small artificial trees, but, she admits, "I love the smell of the real ones.'"

Zhanna says getting a New Year's tree was especially difficult because of her initial difficulty with the English language. "I had great difficulty with the language," she anoes, "but they were very patient with me and helped me a lot." "I thought if I had an American college diploma (in music) then people would know that I know what I need to know to teach here." "With my credentials from Russia and an American degree, I think I may be able to get a professional job teaching,'" says Zhanna, who feels "I can be really useful to my new Motherland.'"

Zhanna says she would like very much to remain in Russia. "It was my favorite holiday because it wasn't revolutionary.'
Research and Grants Administration

Request for proposals

The Office of Research and Grants Administration will be providing information to faculty and staff about requests for proposals (RFPs) on a regular basis in this column. Faculty and staff interested in obtaining further information or applications and deadlines need only circle the number of the RFP on the coupon below and send it to the office in Roberts 312.

1. American Philosophical Society: General Research Grant Program. Awards support basic research in all fields of learning by those holding a doctoral degree or the equivalent. Grantees are intended to help defray research costs such as travel and the collection and preparation of materials. Maximum award levels range from $3,000 to $4,000. Program has Feb. 1, April 1, Aug. 1, Oct. 1, and Dec. 1 deadlines. DEADLINE: Feb. 1.

2. Corporation for Public Broadcasting: Annenberg Grants. Two project categories are funded: Materials Development Projects support the development of course materials to assist students unable to attend classes on a full-time basis in obtaining a liberal arts or science baccalaureate degree; and Telecommunications Demonstration Projects support new approaches to the uses of telecommunications technologies in teaching and learning. Proposals that focus on developing a curriculum and subjects to teach (i.e., science, business, and cultural understanding) are particularly welcome; deadline cited is for preliminary proposals. DEADLINE: Feb. 27.

3. National Council of Teachers of English Research Foundation: NCTE Grants. Regular grants support theoretical or applied research that is significant in the teaching and learning of English, including studies of the English language and related fields. Awards generally range from $5,000 to $25,000. Collaboration grants of $5,000 and less support classroom-based cooperative research by pre-K-to-12 teachers and university researchers. DEADLINE: Feb. 15.

4. United States Department of Education: FITSE Drug Program: Institution-Wide Projects. Supports projects to develop, implement, operate and improve drug abuse education and prevention at the postsecondary level. Projects should be comprehensive, institution-wide in scope and should focus on preventing or eliminating student drug and alcohol abuse. Direct or indirect training activities for students, faculty and staff are allowable. In FY 90, ED expects to award 95 grants with $800,000 each. DEADLINE: Feb. 22.

5. United States Department of Education: FIRST: National Program for Math and Science Education. Supports demonstration projects designed to improve the quality of K-12 teaching in mathematics and science. The program has two absolutely separate RFAs: FY 90: improving teacher qualifications and skills in math and science; and improving math and science curricula by including the use of new technologies. ED expects to have $3.5 million available to fund around 15 awards. DEADLINE: Feb. 20.

Next issue of What's News is Monday, Jan. 22.

DEADLINE for copy, photos, etc. is noon, Tuesday, Jan. 16.
Rhode Island College recognized 218 employees with at least 15, 20, 25, or 30 years of service at the second annual Service Recognition Day dessert reception at Donovan Dining Center Nov. 29. In addition, 12 people with 30 or more years were treated to a special morning reception in President Carol J. Guardo’s office the following day.

"It is my wish that the Rhode Island College Service Recognition Program will help every employee to feel a sense of partnership and identification with the College," Sundberg said.

During the afternoon event, pins and certificates were given to members of the faculty and administrative and support staff as a token of the College’s gratitude for their efforts and long-term employment. A plaque inscribed with the names of those people who have served the College for at least 30 years was also unveiled. The plaque will be on permanent display in the President’s reception area.

"I extend a warm congratulations," Guardo said.

Under the guidance of President Carol J. Guardo, the annual event was initiated to identify and officially recognize Rhode Island College employees for their long-time employment.

Guardo, who presided over the reception and was assisted by Gordon N. Sundberg, director of personnel services, thanked those who attended the luncheon and said that the “College is grateful and indebted to you for the kind of investment you have made to each of us.”

"On behalf of the entire College, I extend a warm congratulations," she said.

Fifty Rhode Island College students named to Who’s Who

Fifty Rhode Island College students have been selected as national outstanding leaders and will be included in the 1990 edition of Who’s Who Among Students in American Universities and Colleges. Campus nominating committees and editors of the annual directory have included the names of these students based on their academic achievement, service to the community, leadership in extracurricular activities and potential for continued success.

These Rhode Island College students join others from more than 1,400 institutions of higher learning in the United States and several foreign nations.

The following are the names of selected students:

A look back... a look forward...

President Carol J. Guardo who officially took office January 1, 1986 will step down from her post here January 1, 1990 to become president of the Great Lakes Colleges Association in Michigan.

Under her leadership Rhode Island College took giant steps forward in increasing enrollment figures, completing building projects, enhancing the image of the College, both internally and externally, and infusing a greater sense of pride to the entire College community.

During a recent farewell reception in her honor she reflected on key areas of the College she addressed four years ago. In restating the "three words" she had spoken about before, Guardo once again emphasized "the people, the programs, and the prospects."

She said: "the people" of Rhode Island College are "dedicated and creative" and that every effort should be made to continue to "root our home."

Of the programs Guardo said: "they are fundamentally sound...are the heart and soul of the College...and...the dynamics to carry the institution forward."

And of the prospects she said: "We are very, very promising. Rhode Island College is capable of national recognition by the year 2000."

In answering the following four questions asked of her by the editor of What's News, the President took a look back on her years at Rhode Island College and traveled forward to explain what, she believes, the future holds for the College.

1) Is there one item out of the following list that you were directly involved in which affected your own personal life or professional outlook about Rhode Island College?

a) the development of a new course of study, program, or curriculum
b) a student you became involved with and with whom you developed a special kind of relationship or friendship, or someone-faculty, administration or staff-who helped or assisted you at a time when you least expected or requested it
c) a project for the betterment of the College that you became involved in which you would like to see continued, perhaps more than any other

d) The projects which relate to "making a difference" are those I'd most like to see continued. They cover a wide range but a few examples may suffice. I'd like to see the efforts to tell the Rhode Island College story continue whether in our recruitment efforts, our promotional campaign, or our presentation of our success stories of students and faculty. Relatedly, work on retaining and the value-added project are important. As a bottom line, I'd simply like to see the forward movement that I've witnessed be continued and enhanced as we go on.

2) As a psychologist, if you were to identify Rhode Island College with a particular psychological personality type, which would it be and how would you advise the College community to "nourish" it so as to become "strong" and to realize its true potential?

This is a difficult question. Every community of people essentially has as many personalities as it has people and there is no dearth of distinctive personalities in this College. It is one of the dimensions which makes it an interesting place. However, if forced to some common description, I'd probably say that Rhode Island College has a personality in transition.

You may recall that a couple of years ago, when we were about to celebrate our 30th anniversary on this campus, I spoke about the dawning of a new maturity. What I was referring to was the fact that as a comprehensive college, Rhode Island College was entering its maturity. So are its people entering their maturity as a community.

We've grown to the point, in age and size, where some of the expansion and experimenting of earlier years is behind us and choices for future new initiatives become more selective.

3) Considering the changing demographics of Rhode Island College, from the more traditionally aged student to one who is a part-time student, with family responsibilities and other obligations, to the more promising future all at the same time. Precisely that ability to move forward on these several fronts, their unique values in mind, will bring strength to the College and its promising future to fruition.

The task force which examined the issues involved made some very sound recommendations and we have proceeded carefully and systematically to implement them. I'd like to see that agenda continue.

We don't need to move in these directions because of enrollment concerns, given our record levels of enrollment, but rather because it is our mission to serve those Rhode Islanders who seek our services and they will grow more and more diverse—age, sex, race— in the years to come.

We can do this. We can find that range it takes to serve them well whether that means more night and weekend classes, or more days or otherwise. We can do it if we make the case forcefully that we need the resources to allow us to be responsive in this way.

4) In a past address to the campus community, you touched on the point that Rhode Island College had the potential to become one of the country's leading public institutions of higher education by the year 2000. Do you still see the College heading in that direction?

There is no doubt in my mind that we have the requisite talent and quality to achieve this goal. To do so, however, the College must receive a more than adequate funding base, have a sense of vision about what the future can hold, and have the will and the courage to go after that vision in a concentrated effort. We are taking advantage of a shared belief, a truly common purpose, and a College-wide commitment to push, pull, and propel toward that end. The decade ahead is one of great promise—the demographics turns in our favor in two or three short years, the students will bring us an enriching diversity, faculty will become more and more valued as the shortage of qualified replacements begins to impact on our institutions, and staff will be attracted and retained by the marvelous challenges these years will bring. In all, exploiting (in the best sense of the word) the conditions for excellence and pronunice as one of the best of its kind can become the College theme for the 90's. I commend it to you.

Among the many events President Carol J. Guardo presided over for the last time was this year's annual tree lighting ceremony held last month. Pictured above with Guardo are several of the many children who listened to her recite the story, "Twas the Night Before Christmas." The evening was filled with music and merriment for the children as well as the adults.
Recreation Center officially opens

Expert says use it in ‘good health’

The new Recreation Center should be used for more than just physical education, according to Dr. Paul Davis Thompson. "It should be used to learn about many lessons in life ... to integrate the body, mind and spirit."

Thompson, of Providence, a well-known health expert and director of The Miriam Hospital Cardiac Rehabilitation Program, was the keynote speaker at the dedication and formal opening of the Recreation Center held Wednesday, Dec. 13.

The opening was preceded by a luncheon in the South Dining Area in the Faculty Center at which 60 people attended. In the recreation center’s front lobby, Vice President for Student Affairs Gary M. Penfield greeted everyone present and commented that the new recreation facility contributes to the well-being of the college community. He praised President Guardo for her efforts in making the center a reality.

Arthur Marcon, chief of staff for Governor DiPete’s office said that the state is proud of Rhode Island College and the new facility.

President Guardo welcomed those in attendance and commented that the center is a culmination of more than three years of hard work and persistence. "It’s a significant step forward for Rhode Island College," she said.

She thanked all of those involved in the project and said she believes that the new center will improve the overall quality of life at Rhode Island College and will help with recruitment and retention of students.

With Phase I of the center completed, Guardo said that she firmly believes that the faculty, staff and students will lobby her successor to complete Phase II.

Thompson then addressed the group, saying that he was honored to be asked to participate in the dedication of such a facility. In his address he stressed the benefits of exercise in preventing heart disease.

Thompson graduated from Tufts Medical School in 1973 and is associate professor of medicine in the Brown University Program in Medicine. He is a national fellow of the American College of Sports Medicine and the American Heart Association Council on Clinical Cardiology and Epidemiology.

He serves as associate editor of Metabolism, and corresponding editor of the International Journal of Sports Medicine. In addition, he has published extensively and been guest lecturer at numerous universities and medical conferences and has made several national television appearances.

Penfield then introduced Sandra E. Surdut, whose efforts to help foster the state’s public education system. In his address he stressed the benefits of exercise in preventing heart disease.

Surdut, whose efforts to help foster the state’s public education system, cut the ribbon signifying the official opening of the recreation center.

Following the ceremonies, tours of the center were conducted and refreshments were served.

Carlotti to be honored at State House ceremony

Albert E. Carlotti, chair of the Board of Governors for Higher Education, and President Carol J. Guardo cut the ribbon marking the official opening of the center. (What’s News photo by Gordon E. Rowley)

Carlotti to be honored at State House ceremony

Hosted by the board, Carlotti will be cited for his tenure of 16½ years "...of distinguished service to the citizens of Rhode Island," initially as governor-appointed chairman of the Board of Regents for Education (1973-81) and then, in 1981, as chairman of the Board of Governors for Higher Education, after a restructuring by the General Assembly of the state’s public education system.

"All who have worked with you in the pursuit of excellence for education in Rhode Island will long remember your dedication, vigor, enthusiasm, sense of fair play, expertise in finances and management, and, most of all, your integrity," says the citation to be presented to Carlotti.

The Board of Governors is responsible for the governance of the University of Rhode Island, Rhode Island College and the Community College of Rhode Island. Carlotti graduated from the University of Rhode Island in 1932 with a degree in mechanical engineering. He holds honorary doctorates from this College, which he received in 1980, and from Roger Williams College. He is the recipient of the RAM Award, presented to him by the URI Alumni Association for meritorious service.

He is retired from the real estate and investment business.

Carlotti and his wife, Rose, have two sons, Dr. Albert E. Carlotti Jr. and Stephen J. Carlotti, Esq.
Marketing major wins scholarship to seminar

Senior marketing major Susan M. Motta of West Warwick, won a scholarship to the William Howe Direct Marketing College, an intensive, professional first-semester seminar designed to introduce students to direct marketing.

Urged to apply for the one-week program by economics and management professor Joel Fuerst, Motta was one of only 30 students chosen from several hundred full-time college senior applicants to attend the institute, held at Lincoln College, Oak Brook, Ill., Nov. 27 to Dec. 2.

The institute was sponsored by Metromail as a tribute to the late Bill Howe, former president and CEO of Metromail, The Direct Marketing Educational Foundation conducted the program.

Leading professionals presented a basic overview of the direct marketing field and covered specific topics including direct marketing, telephone marketing, cataloging, business-to-business direct marketing, telephone marketing, multimedia, copywriting, lists and databases.

In addition, students had the opportunity to work on seminars and learn how to promote themselves in a competitive job market.

Motta was chosen for her potential success in marketing. She is currently serving an internship in market research at Hasbro and is executive vice president of the Rhode Island College ROTC.

Corps numbers down; extra effort needed

Rhode Island College ROTC cadets will hold a raffle Jan. 28 to benefit the Ronald McDonald House of Providence and to support the annual military ball which, as in the past, will be held in conjunction with the Providence College ROTC.

With a corps of only seven cadets this year at Rhode Island College, the ROTC students will have to try extra hard to come up with profit-sharing of the ball, says Cadet 1st Lt. Brian G. Thornton of Cumberland, who is in charge of the raffle arrangements.

The PCs cadets recently number approximately 50 this year.

The ball is slated for Feb. 23 at the Providence Omni Bilmore's, one of only 12 in the heat institution for ROTC in this area.

In 1984, however, the numbers had grown to the point that the Rhode Island College offered a full-fledged ROTC program and even conducted its own commissioning ceremonies.

This first time the cadet corps here was sufficient in number to do away with the corps of boosters which at times numbered as many as 30 points over the

Anchorwomen upset top rated Huskies

After three years of frustration the Anchorwomen basketball team pulled off a major upset Saturday, Dec. 2, in Walsh Gym, knocking off the nationally second-ranked Little East Conference champion the University of Southern Maine 57-56.

The loss is the Huskies' first in the Little East Conference since the inaugural season, 1986. On Dec. 6, 1989 the Anchorwomen defeated the Huskies 54-49 in Walsh. Southern Maine's only two losses in conference play have come at the hands of the Anchorwomen.

The team has been blasted by Southern Maine by as many as 30 points over the past three seasons. That once was a very real threat of victory for coaches Ken Hopkins and Ray Tessaglia. "It feels good," Hopkins said after the win. "We wanted this one for a long time."

With about ten minutes left in the game, victory seemed almost certain for the Huskies. They had just jumped out to a 52-36 lead and were cruising along pretty good, until freshmen Katie Baker, Robin Gobellie, Jill Corey, Jonette Walker and Ramona Foster took over. They led a spirited rally back to saw the Anchorwomen go on an 18-0 run that narrowed the margin to 52-47. It was a nice and the rest of the way with Gobellie's three-pointer with 1:40 left giving the Anchorwomen a 55-54 lead.

Huskies came back with a hoop of their own, but Debbie Allen's two free throws iced the victory.

Allen led all scorers in the contest with 21 points and also had a game-high 13 rebounds. Jonette Walker and Corey were next in the scoring department with eight points each. Junior Ali Stark led the anchorwomen in career-high 12 rebounds in the game.

The win improved the team's record to 12-1 the first time in a very long time.

The Anchorwomen are now assured the first place in the Little East, tied for first place with Southeastern Mass. University.

Their next home game isn't until the middle of January.

Men's Basketball

The Anchormen basketball team had a big win of their own recently, knocking off the Southern Maine men by a 91-88 score in the NCAA Division III Final Four.

The victory improved the team's record to 3-0 overall, 10 in the Little East. The Huskies are the defending champs in the conference and reached the NCAA Division III Final Four last season.

Junior Chris O'Toole's lay-up and subsequent free throw gave the Anchormen an 88-88 lead and senior Jeff Allen iced the win with a basket in the final seconds. Senior center Troy Smith led six Anchormen in double figures with 17 points in what was the most balanced attack in a single-season game in a very long time.

Senior forward Chuck Santos scored a career-high 14 points, O'Toole and Allen added 13 apiece. Dante Maybray added a dozen and Dan Comella chipped in with 11.

College debate team competes in World tournament

by Jeff Fiedler

Rhode Island College will be sending five students to compete at the World Debating Championships Dec. 27 through January 4 in Glasgow, Scotland.

The College will be sending two teams and a coach who will serve as a judge in the debating rounds. The students are Rick Berger, Jennifer Bennett, Mary Healy, Rosina Hunt and Paul Spameni. Students were selected by the team coach, Audrey Olmsted, based on outstanding performances at tournaments throughout the semester.

The world championships bring together over 200 teams from countries such as England, Belgium, New Zealand, France, Greece, Canada and the Soviet Union. All participating teams are required to debate in English in the world debate style. This style is slightly different from the parliamentary one used in North American tournaments. World debating teams consist of four to six members as opposed to two in the parliamentary style.

Topics are usually political and are debated with little interpretation. Opposing teams can question one another during their arguments and the questions are not limited to the subject matter. American theatrical teams have been the ones that in the past have claimed Olmsted.

Last year, more than 900 productions and 17,000 students participated in the festival.

Central to the educational goals of the festival are a number of awards and scholarships given at both regional and national levels. Student awards and scholarships are given in playwriting, acting, direction, and both scenic and costume design.

The festival is sponsored by the Kennedy Center Corporate Fund, the U.S. Presidential Commission on the Arts and the New England region of the ACTF. Region I (which represents the six New England states) will be the hosts for the 22nd annual American College Theater Festival Jan. 24-28.

The New England region festival this year will focus on the directorial and design elements of the theater, according to Malley King, festival spokesperson.

The Brilliant young violinist, Stephanie Chase, has captivated audiences and won critical acclaim for her performances throughout North America, Europe and the Far East, according to John Custer, director of the College's Performing Arts series.

The music of Mozart, Beethoven, and Brahms will be heard in Rhode Island College's Roberts Hall auditorium on Saturday, Jan. 20, as classical violinist Stephanie Chase and pianist Steven Lubin take the stage at 8 p.m.

The brilliant, young violinist, Stephanie Chase, has captivated audiences and won critical acclaim for her performances throughout North America, Europe and the Far East, according to John Custer, director of the College's Performing Arts series.

The New York Times noted of her 1978 performance in Alice Tully Hall in that city that her affinity for the violin is natural and highly developed. Her tone is unusually sweet and firmly centered. An unusually talented and thoughtful musician.

Miss Chase had made her Carnegie Hall debut two years earlier.

With the release of the first complete transcription on original instruments (with Christopher Hogwood conducting), the New England region of the American College Theater Festival Jan. 24-28.
TELLING STORIES at the Storytellers Showcase Dec. 11 at the College's Henry Barnard School is Valerie Tutson, one of 13 storytelling enthusiasts gathered to compete. Some 200 students from kindergarten through the sixth grade listened as each storyteller spent 15 minutes doing his/her best to impress the children and the state Department of Library Services representatives. (What's News Photos by Gordon E. Rowley)

Rhode Island College has exceeded by 80.2 percent its goal this year in contributions to the State Employees Charitable Appeal with $40,130 having been pledged to date, according to William M. Baird, campus appeal coordinator. The 1989-90 goal had been set at $36,408 or seven percent higher than the previous year's goal. The number of donations was 506 at an average of $79.31 each. Some 20 units or departments on campus had a 100 percent participation rate with another 35 groups crossing the 75 percent mark.

"Everyone who helped us in this effort can be proud of his/her part in this worthy cause," says Baird.

College exceeds appeal goal
