

Rhode Island College Mobile Catalog Readme
Administrative Edition

Contents:

System Requirements
Installation Instructions for Mobile Catalog
Updating the Database on your Mobile Device
Installation Instructions for Administrative Tools
Troubleshooting
Program Information

System Requirements:

For Pocket PC Program:

- Pocket PC running Windows CE, Windows Mobile 2003/2003 SE, or Windows Mobile 5
- EVB Runtime (included on this CD)
- ARM processor (see device manual)
- A method of attaching device to your desktop computer (wireless network, USB cradle, ect.)
- Microsoft ActiveSync on both your desktop and your Pocket PC (included with most Pocket PCs and free on www.microsoft.com)

For Desktop Program:

- A PC running Windows XP

Installation Instructions for Mobile Catalog:

- 1) Insert CD-ROM into desktop computer CD drive.
- 2) Open the folder entitled "For End Users"
- 3) Open the folder entitled "RIC Mobile Catalog"
- 4) If you are running Windows CE, skip this step. If you are running Windows Mobile 2003/2003SE/5, you will need to install the eVB runtime (eVB_Runtimes.cab). To do this, drag the file onto your Pocket PC using Active Sync (see ActiveSync help for more information on this step.) Tap on the file to install.
- 5) You have two choices for installing the Mobile Catalog onto your device.
 - A: Open the "RIC Mobile Catalog" folder on the CD. Using ActiveSync, drag and drop the file PPCSetup.cab onto your device. Using your device, browse to the file and tap on it to begin installation.
 - B: With your device connected to your computer, open the folder "RIC Mobile Catalog" and locate the WinSetup.exe file. Double click this file and follow the on-screen instructions to install the program on your device.
- 6) By default, the program will install into your Program Files folder. It is strongly recommended that you do not rename or move this file.

7) Using ActiveSync, transfer the CourseCatalog.cdb and catalog.bmp files from the "RIC Mobile Catalog" folder into the My Documents folder of your device.

Updating the Database on Your Mobile Device:

The database that this program feeds from is located in the following location: /My Documents/CourseCatalog.cdb.

- 1) Obtain a copy of the new database from Rhode Island College
 - 2) Using ActiveSync, browse to the My Documents folder on your device and delete the old database.
 - 3) Drag and drop the new database into the My Documents folder on your device.
- You are now ready to use the new database.

Installation Instructions for Administrative Tools:

- 1) Insert CD-ROM into desktop computer CD drive.
- 2) Open the folder entitled "Administrative Tools"
- 3) Double-click the file AdminSetup.exe to begin installation. This will install the Administrative Tools program, which will allow you to delete, update, and add courses to the Mobile Catalog database.

Note: You must install the program into the default directory. Changing the path may cause problems with the program, and is not recommended.

The program will install to C:\Program Files\Administrative Tools. When you are finished working with the database, you will find the file at C:\Program Files\Administrative Tools\CourseCatalog.mdb. This is the file that may be given to students, faculty, and staff to update their devices.

Troubleshooting

--Database Not Found

-If you receive this message on the Pocket PC, ensure that the CourseCatalog.cdb file is located in the My Documents folder of your device. Do not relocate or rename this file.

-If you receive this message on the Desktop PC, ensure that the CourseCatalog.mdb file is located in C:\Program Files\Administrative Tools\CourseCatalog.mdb.
