Operating System: WM2005

Program Version: Beta 1.5

Did you have any problems installing the program?

Database wouldn't sync, had to convert and copy over the CDB directly (fault of WM2005?)

Did you have any problems running the program?

No

Did you have any problems navigating through the program?

No

Did you notice any bugs in the program (please be specific), such as cut-off text? Text wrapping off the screen in "Description" without a scroll bar (ex. CSCI 401)

Please list any suggestions you have for future builds:

Package the CDB with the distribution rather than, or in addition to, the MDB
